

To Whom It May Concern:

I have heard PBS programs about the FCC passing rules to give more autonomy and power to the big conglomerates already running the media industry. I am opposed to this ruling as I feel that free and diverse speech can only be maintained by having as many divergent and small stations out there.

It is big business, thru their lobbying power in Washington, DC which is running this country as it is. To give them more power through air rights, etc. is not anything our forefathers and signers of the Constitution would have supported.

Sincerely,

Jody Harrow
